

Archroma Packaging Technologies

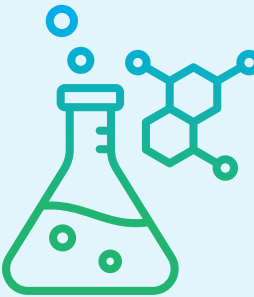

Our innovations touch every aspect of modern life, bringing more sustainable chemistry to diverse markets like food and beverage packaging, printing and writing paper, e-commerce boxes, luxury packaging, and even paints and construction.

Our expertise in chemistry (and the tailored solutions we provide), however, are only one part of the story.

We also have...

More than a century of knowledge & experience

140+ years
in chemistry
innovation for
cellulosic materials

Dedicated experts
in packaging,
tissue &
toweling,
wood,
construction,
paints &
coatings

Supporting the whole value chain
– pulp mills, paper mills, converters & brands

Application specialists
covering the four corners of the globe

Trusted
by ~2,000 paper mills & converters worldwide

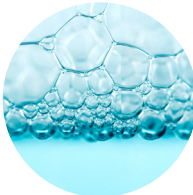

Recognized with
ISO & EcoVadis Gold
accreditations

Collaboration with
1,000 multi-disciplined subject matter experts
across the Archroma business

A broad product portfolio & continued innovation

An expansive portfolio of...

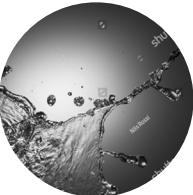

Process chemicals

Optical brighteners

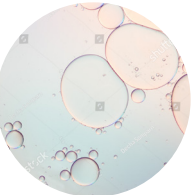

Coloration

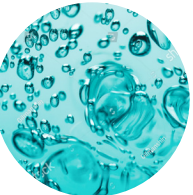

Barriers

Coatings

Primers

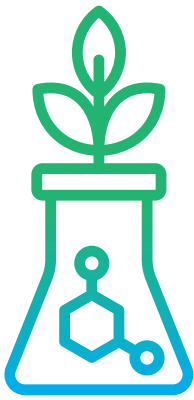

Adhesives

Additives

36+
patent families

Continual R&D
in solutions for packaging that set the stage for true market transformation

A truly global infrastructure

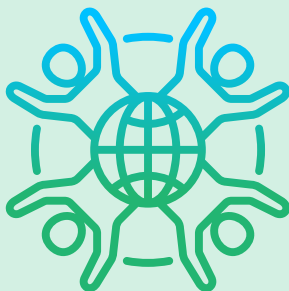

Located in North Carolina's
chemical industry cluster

15

worldwide application sites

27

strategically located manufacturing sites

~975
employees in

42

countries

A laser focus on sustainability, circularity & safety

Water-based and partially bio-based chemistries that are repulpable, & recyclable

Products that are...

FDA
food contact

MercoSur

...approved

Products that are:

A personalized approach & tailored solutions

Adaptable formulations
to meet specific application and customer challenges

Substrate agnostic chemistry

that performs across a variety of materials

Continued collaboration with:

SAFI Consortium
sustainable & alternative fibers initiative

United Nations Global Compact
