

/ InOneGO

Unique All-In-One Continuous Process for DIRESUL® RDT Dyes

InOneGO is a complete continuous dyeing process that combines coloration, fixation and softening into a single pad-dry application step. Unlike conventional dyeing methods that require multiple wet processing stages, **InOneGO** offers an “all-in-one” approach designed to simplify production while reducing resource consumption.

BENEFITS

- / Water-free application process
- / Reduced process time*
- / Lower energy consumption*
- / Potential reduction in processing-related CO₂ emissions*
- / Increased productivity through process simplification*

CREATE

- / Earthy and natural shades
- / Deep blacks
- / Special blues
- / Vintage wash-down effects
- / Solid color looks
- / Overdyed denim effects

*Results are based on a production case study comparing InOneGO with a conventional benchmark dyeing process; actual results may vary depending on production conditions
